# CAREER TRACK ANALYSIS TABLEAU VISUALIZATIONS

Number of Enrollments and Fraction of Completions:

Developed a combo chart in Tableau with a bar overlayed by a line chart. The bar chart represents monthly track enrollments, while the line chart shows the percentage of track completions relative to enrollments. Added a filter to differentiate between career tracks.

Duration of Track Completion:

Created a bar chart to visualize track enrollments by completion bucket. The chart includes completion categories such as "Same day," "1 to 7 days," "8 to 30 days," and so on, with bars ordered accordingly. Implemented a filter to refine data by career tracks and removed any NULL entries for clarity.
